# EUROPEAN STRATEGY

## Communication of the EC April 2016

- *As part of the package of measures for Digitising European industry, the "European Cloud Initiative – Building a competitive data and knowledge economy in Europe" aims to strengthen Europe's position in data-driven innovation, improve its competitiveness and cohesion, and help create a Digital Single Market in Europe.*
- *This initiative will provide European science, industry and public authorities with:*
  - *a world-class data infrastructure to store and manage data;*
  - *high-speed connectivity to transport data; and*
  - *ever more powerful High Performance Computers to process data*
